

CONCEPT DENARI AND LAVEI OILS

Among the lands of Soave and Valpolicella, along with the vineyards, it has been customary from time immemorial for the farmers of these places to plant **olive trees** for domestic use.

Over the years, the Tessari Family, following various acquisitions of vineyards, has therefore also managed to put together an **extraordinary olive-growing heritage**.

These centuries-old olive trees now extend over an area of about **9.000 square metres** with about **500 trees**.

Today, after careful identification of the varieties present, **Grignano - Favarol - Leccino and Frantoio**, two organic and PDO oils are produced, with an extraordinary territorial identity.
